IT SUPPORT | APPLICATION SUPPORT | JUNIOR SOFTWARE / SYSTEMS

PROFESSIONAL SUMMARY

Douglas College Computer Studies & Information Systems diploma graduate with hands-on experience in Windows/Linux, networking, cloud infrastructure, Python/Java/JavaScript, databases, full-stack web development, Android development, and machine learning. Built practical projects using React/Node.js/MongoDB/Firebase, Android/Firebase APIs, and scikit-learn. Brings three years of operations experience supervising a small team, with strong troubleshooting, communication, organization, and problem-solving skills.

TECHNICAL SKILLS

Systems & Networking: Windows, Linux/Ubuntu, virtual machines, TCP/IP, CIDR/subnetting, network diagnostics, troubleshooting

Cloud & Infrastructure: Google Cloud Platform (GCP), Terraform, Compute Engine, Apache, Firebase, Git/GitHub

Programming & Web: Python, Java, JavaScript, HTML/CSS, React, Node.js, Express.js, REST APIs

Data & Mobile: SQL, MongoDB, scikit-learn, pandas, Android SDK/AndroidX, Retrofit, Gson, Glide

TECHNICAL PROJECTS

Silent Auction Platform | *React* | *Node.js* | *Express.js* | *MongoDB* | *Firebase Auth* | *Socket.IO*

- Built a full-stack auction platform with authenticated users, REST APIs, MongoDB persistence, real-time bidding, auction closing, and automated winner emails.

Workout Planner Android App | *Java* | *Android SDK* | *Firebase* | *Retrofit* | *Wger API*

- Developed a native Android fitness app with email/Google authentication, profile and weight tracking, an API-powered exercise library, and dated progress photos/data stored with Firebase.

Spam Detection Machine Learning Model | *Python* | *scikit-learn* | *pandas* | *Random Forest* | *UCI Spambase*

- Built and evaluated a spam classifier using Logistic Regression and Random Forest with stratified splitting, cross-validation, confusion-matrix analysis, precision/recall/F1, ROC-AUC/PR-AUC, threshold tuning, and model persistence.

Cloud Infrastructure & Automation Lab | *Terraform* | *GCP* | *Ubuntu* | *Apache* | *Networking*

- Provisioned a GCP VM and static IP with Terraform, deployed Apache on Ubuntu, and load-tested 15,000 requests at 100 concurrent connections.

PROFESSIONAL EXPERIENCE

Branch Manager / Operations Coordinator | Globalfer - Metal Cutting & Bending Branch | Brazil | 2017-2020

- Managed daily branch operations, production priorities, workflow and materials, and resolved operational issues in a hands-on small-business environment.
- Supervised two employees and coordinated requirements with the affiliated parent business, strengthening communication, prioritization, accountability, and team coordination.

EDUCATION

Diploma - Computer Studies & Information Systems | Douglas College, New Westminster, BC | 2024-2026

Selected coursework: Operating Systems; Database I & II; Virtualization & Computer Networks; Full-Stack Development with JavaScript; Cloud Infrastructure; Scripting for Cybersecurity; Mobile App Development; Machine Learning.
